Abstract (en)

The invention is directed at the packaging sector of food products for human consumption. More in detail, the invention relates to an improved draining tray (1) for containing fresh food, comprising: - a first bottom layer (2) and raised side walls (4); - a second bottom layer (3) positioned in the inside part of said tray (1) and creating a hollow space with said first bottom layer (2), wherein said second bottom layer is provided with through holes (5); - a layer of absorbent material (6) suitable for contact with foods arranged in said hollow space; - retaining means of said second bottom layer (3) on said first bottom layer (2); - vertical alignment means, adapted to guide the insertion of said second bottom layer (3) in said tray (1).
