Abstract (en)

[origin: WO2017071937A1] The invention relates to a data page and to a method for the production of said type of data page, in particular for a book-like document, comprising at least one single page (27) for applying and/or storing data, the at least one single page (27) having at least one layer or printed layer, and at least one flexible tab (23) which is connected to the single page (27) in an overlapping area (30) with the at least one tab section (34, 35) of a tab element (32) and the tab (23) comprises a projecting free tab area (31), said tab (23) in the overlapping area (30) being formed with at least one electric conductor element (33) which is made from metal wire consisting of special steel or a shape memory alloy, nitinol or carbon fibers or conductive plastics. Said tab element can be made from metal fabric or metal braid.
