Abstract (en)
[origin: WO2017072185A1] The invention relates to a container (11) produced from a plastic material by extrusion blow moulding, comprising a container body (13) and a first end (15) and a second end (17) substantially opposite the first end (15). According to the invention, the first end (15) has on the inner wall thereof a first sealing surface (21a) and a second sealing surface (21b) substantially opposite the first sealing surface (21a), wherein the first and the second sealing surface (21a, 21b) can be connected to one another in a fluid-tight manner. The second end (17) is closed in a fluid-tight manner and is formed as a container base (18) having a base (19).
