Abstract (en)

[origin: EP3162743A1] The present invention discloses systems and methods for remote centralizing palletizing. According to some embodiments, the system includes a plurality of stations (320, 330, 340). Each station performs at least one operation associated therewith. The operation is selected from a list of operations comprising separating and/or layering/loading. Each of the plurality of said stations (320, 330, 340) is connected and configured to provide an input for any of the other of the plurality of stations (320, 330, 340) to any of the other operations.
