Abstract (en)

[origin: WO2017072031A1] Described is an apparatus for feeding a plurality of threads to rotating godets (10.1-10.4) of a melt spinning machine, comprising a manual injector (16) and a cutting device (24). In order to be able to selectively feed the threads individually or as a bunch, according to the invention, a transfer device (17) and a second manual injector (18) are associated with the manual injector (16).
