Abstract (en)
[origin: WO2017072309A1] The invention relates to a fluid injection system comprising a pipe section (1) in which an injection device (5) is arranged, and comprising an evaporator device which is arranged downstream of the injection device and with which a downstream catalytic converter (3) is associated; in said catalytic converter (3), a fluid injected by the injection device (5) undergoes a catalytic reaction with the exhaust gas. At least one additional injection device (5) is arranged in the pipe section (1).
