Abstract (en)

[origin: WO2017072402A1] The present invention relates to a method for manufacturing a ballistic armor, comprising at least the steps of aligning armor elements (102) in front of a casing provider arrangement (104), and supplying a casing around the armor elements (102) such that the armor elements remain inside the casing. Further, the present invention relates to a method for inserting armor elements to a casing structure, comprising at least the steps of manufacturing a casing, and inserting armor elements in the cavities of the casing. Further, the present invention relates to a ballistic armor comprising a number of armor elements capsuled in a casing, and a casing forming a number of longitudinal cavities for the armor elements.
