Abstract (en)

[origin: WO2017072132A1] An assembly of a plug connector part comprises a holder frame (1) for receiving at least one modular contact insert (2), wherein the holder frame (1) surrounds an opening (100) in which at least one contact insert (20) can be inserted, and a housing part (3) which has a receiving opening (300) in which the holder frame (1) can be inserted in an insertion direction (E) and a support segment (305) on which the holder frame (1) is supported in an inserted position in the receiving opening (300). According to the invention, the housing part (3) has a locking opening (30) and the holder frame (1) has a locking unit (4) for locking the holder frame (1) to the housing part (3) in the inserted position, wherein the locking unit (4) has a locking element (41) which, in a locked position, interlockingly engages in the locking opening (30) of the housing part (3). In this way, an assembly of a plug connector part is provided, which can facilitate the connection of a holder frame to a housing part.
