Abstract (en)
[origin: US2018249882A1] A water-conducting domestic appliance, in particular a dishwasher, includes a wash container for holding items being washed, a first container and a second container for holding water. A thermal insulation is arranged between the first container and the wash container. The second container is arranged in thermal contact with the wash container. A decanting device is provided for transferring the water from the first container into the second container to dry the items being washed.
