Abstract (en)
[origin: WO2017076487A1] The invention relates to a lying and seating element consisting of one or more interactive spring elements, characterised in that one or more spring elements (1, 1'), fully or partially and by means of shapings (2, 2', 3, 3', 4, 5, 6, 7, 8, 9, 11, 18, 19) and/or devices (10, 12, 13, 13', 13'', 14, 15, 16, 17, 20), applies against exerted pressure A a counter pressure A' higher than is the case of pressure B, which is exerted from the other side and against which a lower resistance B' is set, and as a result pressure A builds counter pressure A'' in the relevant adjoining region.
