Abstract (en)
[origin: WO2017077074A1] The invention relates to an avalanche protection device comprising the following: - an avalanche protection backpack (1) with at least one inflatable buoyant airbag (96) and - a breathing system (70) with a breathing housing (11) which - connects an inhalation one-way valve (13) to an inhalation tube (31), at least one suction nozzle (28), and at least one ambient air suction zone (30) and which - connects an exhalation one-way valve (14) to an exhalation tube (15) and a CO2 exhalation region (16), wherein a mouthpiece (12) is provided on the breathing housing (11), and the mouthpiece (12) can be automatically tightened onto the mouth of the avalanche victim (24) by means of a facial airbag (36) by actuating a trigger handle (58). The invention additionally relates to a method for using such an avalanche protection device.
