Abstract (en)
[origin: WO2017076691A1] The invention relates to a coupling device for coupling an underwater rescue suit to a submarine (10), wherein a mechanical connection (40) and a connection for supplying breathing air (50) is established/can be established between the underwater rescue suit and the submarine (10) by way of the coupling device. Upon releasing the coupling device, the mechanical connection (40) and the connection for supplying breathing air (50) can be released simultaneously.
