Abstract (en)
[origin: WO2017077057A1] The present invention relates to a structural bearing (1) with at least one slide element (6, 7) from a sliding material which includes at least one polymeric plastic, wherein the sliding material has a melting point temperature of more than 210 °C and a modulus of elasticity of less than 1800 MPa in the tensile test pursuant to DIN ISO 527-2.
