Abstract (en)
[origin: WO2017076579A1] The invention relates to a tank securing frame with at least one vacuum valve (V) comprising, in a housing, a sealing seat and a valve disc assembly (P) which is mounted such that it is linearly movable in relation to the sealing seat, for cooperation therewith, and comprises a valve disc, and a valve rod, at least part of the valve disc assembly (P) being guided in a guide, the valve disc assembly (P) being supported with at least essentially horizontal valve rods in the tank securing frame and the active centre of gravity (M) thereof being positioned at least in the end section of the lift of the valve disc, on the sealing seat between two ends of the guide.
