Abstract (en)

[origin: CA3002265A1] A method for firing an electronic detonator comprising a power storage means comprises receiving (E2), via the electronic detonator, a firing order. The following steps are implemented as long as the delay time associated with said electronic detonator has not elapsed since said reception (E2) of the firing order: measuring (E3) power stored in said power storage means, and firing (E7) said electronic detonator when the measured stored power is less than or equal to a predetermined power.
