Abstract (en)

[origin: EP3372520A1] The invention relates to a unit (1) comprising a stopper (2) and a cap (3) for locking the stopper (2), for shipping sparkling wines. The stopper (2) comprises a cover part (21) and a securing skirt (22) that extends from the perimeter of the cover part (21), the securing skirt being provided with at least one projection (23) oriented radially inwards and intended to fit into an annular opening (A) of the bottle (B). According to the invention, the cap (3) is a hollow cylinder (31) comprising a sealing ring (4) joined to the hollow cylinder (31) and having continuity with the inner surface of the cap (3), such that the sealing ring can perform the function of locking the securing skirt (22) when the sealing ring (4) is facing the securing skirt (22) after relative rotation and axial displacement between the stopper (2) and the cap (3).
