Abstract (en)
[origin: US2018252465A1] A refrigerated goods container for a refrigeration appliance includes at least one wall preferably made from wire mesh, and an end profile. The wall has an end section and the end profile is installed on the end section. A first side surface of the end section includes first latching projections and a second side surface of the end section, which faces the first side surface, includes at least one second latching projection. The end profile is latched with the first latching projections and the second latching projection to the end section.
