Abstract (en)
[origin: EP3373258A1] A money handling machine capable of flexibly responding to a regulation on handling of counterfeit money such as the ECB regulation is provided. The money handling machine includes: a money receiving unit that receives money from an outside of the machine; a transport unit that transports money deposited from the money receiving unit; a recognition unit that recognizes a denomination and authenticity of the money transported by the transport unit; a plurality of storing/feeding units capable of storing the money and feeding the stored money; a money dispensing unit that dispenses the money fed from the storing/feeding units; and a control unit that controls storing of money in the plurality of storing/feeding units and feeding of money from the plurality of storing/feeding units, wherein a first mode and a second mode are set for selectable depositing/dispensing modes, in the first mode, the plurality of storing/feeding units are allocated for respective denominations, and in the second mode, at least one of the plurality of storing/feeding units is allocated for counterfeit money storage. The control unit switches the depositing/dispensing mode between the first mode and the second mode and controls the storing and the feeding of money according to the mode resulting from the switching.
