Abstract (en)
[origin: WO2017142406A1] The invention pertains to a coagulated root- or tuber protein product which is not horny. Such products are characterized by a small particle size, a low density and little color, which makes them suitable for human food applications. The invention further pertains to a process for obtaining non- horny root- or tuber coagulated protein, and to use of these products in human food applications.
