Abstract (en)
[origin: WO2017081132A1] The invention relates to a device (1) for storage of modular functional units (2) to be used in the context of additive manufacturing of three-dimensional objects, comprising - a storage unit (7) with multiple storage sections (9), each of which is configured for storing at least one modular functional unit (2), and - a handling unit (8) that is assigned or can be assigned to the storage unit (7) in order to handle at least one modular functional unit (2), which is configured for inserting at least one modular functional unit (2) into a determined storage section (9) and/or for removing at least one modular functional unit (2) which is arranged in a determined storage section (9) from the or a determined storage section (9).
