Abstract (en)

[origin: WO2017080641A1] The invention relates to a security element for securing documents of value, comprising a transparent carrier substrate and a first semi-transparent function layer, which has a multi-layer structure having a first semi-transparent metal layer, a second semi-transparent metal layer, and a dielectric layer arranged between the first and the second semi-transparent metal layers, wherein the second semi-transparent metal layer at least partially has a layer thickness greater than the layer thickness of the first semi-transparent metal layer.
