Abstract (en)

[origin: WO2017081401A1] The invention relates to device for attaching a powertrain (16) to a motor vehicle body, comprising a front surface and a buffer (13) for reducing the transmission of vibrations between the powertrain and the body. The device comprises a part (10) arranged at the top of the buffer (13) and having at least one ramp (31), on a surface opposite the front surface, that rises gradually in the direction of said front surface.
