Abstract (en)

[origin: WO2017081596A1] The invention relates to a wooden cask (20) for storing and aging wine and other beverages, comprising: four side panels (10, 12), a bottom panel (13) and a top panel (11), said panels (10, 11, 12, 13) being provided with substantially planar outer and inner surfaces and being joined to one another so as to define an internal storage volume (19), vertical beams (14) forming buttresses against the outer surfaces of at least two opposite side panels (10), the two ends of said beams projecting beyond the bottom and top edges of the side panel against which same are fitted, such that the casks (20) may be stacked by placing the beams thereof one on top of the other without the side walls (10, 12) of the stacked casks touching one another.
