Abstract (en)

[origin: WO2017081712A2] A device (10, 100) is described, for opening a gripping element (1010, 1100) of weft yarn of a gripper loom, comprising opening means (11, 101) and positioning means (12, 102), moving between two different operating positions, a drive (20) adapted to control the motion of the opening means (11, 101) and of the positioning means (12, 102). A gripping element (1010, 1100) of weft yarn of a gripper loom actuated by such device (10, 100) is further described. A method for opening such gripping element (1010, 1100) of weft yarn is further described.
