Abstract (en)

[origin: WO2017080703A1] The invention relates to a domestic appliance 1 for treating laundry items, comprising a housing 2, in which a laundry drum 3 is rotatably mounted, and comprising at least one annular imbalance compensation device 13, 14, which is arranged on the laundry drum 3 by means of at least one retaining element 29. The at least one retaining element 29 is secured to the imbalance compensation device 13, 14 and has a ramp-shaped spring clip 33 which is oriented radially outwards with respect to a longitudinal axis A of the laundry drum 3 and which is snapped into a recess 27 in a wall 7 of the laundry drum 3 towards the outside when seen in the radial direction in the final assembled state. The invention also relates to a method for securing an imbalance compensation device 13, 14.
