Abstract (en)
[origin: WO2017080867A1] The present invention relates to a washer/dryer (1) comprising a drum (2) wherein the laundry is placed; a tub (3) wherein the drum (2) moves; a circulation duct (4) wherein the process air (PA) circulation, providing the drying of the laundry, is performed in the drying process; a fan (5) that provides the circulation of the process air (PA) in the circulation duct (4); a heater (14) heating the process air (PA); a condenser (7) that is disposed onto the circulation duct (4) and that has at least one air duct (6) wherein the process air (PA) passing therethrough is condensed; an inlet (8) through which the process air (PA) enters the condenser (7); an outlet (9) through which the process air (PA) leaves the condenser (7), at least one hose (18) that is connected to the water mains and that guides the water received from the water mains to the air channels (6) during the process of cleaning fibers and lints.
