Abstract (en)  
[origin: WO2017081568A1] An upholstery system (1) for covering a surface (2), comprising a functional layer (3) having a rear face of functional layer (5) adapted to face said surface (2), and a front face of functional layer (4) opposite to said rear face of functional layer (5); a finishing layer (8) adapted to cover said front face of said functional layer (4), said finishing layer (8) comprising a first end portion of finishing layer (9) and a second end portion of finishing layer (10) opposite to the first end portion of finishing layer (9); a first fastening device (30) adapted to removably connect said first end portion of finishing layer (9) to said surface (2), and a second flexible fastening device (50) adapted to removably connect said second end portion of finishing layer (10) to said surface (2) so as to retain, in use, said functional layer (3) in a position interposed between said surface (2) and said finishing layer (8) and between the first fastening device (30) and the second fastening device (50); wherein said upholstery system comprises: a first shape-coupling closing band (31), formed by a first half-band (32) and a second half-band (33) removably engageable with each other; a second shape-coupling closing band (51), formed by a third half-band (52) and a fourth half-band (53) engageable with each other by shape coupling; said second half-band (33) being fixed to the first end portion of finishing layer (9); and said fourth half-band (53) being fixed to the second end of finishing layer (10); wherein the first fastening device (30) comprises a first flexible sheet (34) having a fastening portion (35) adapted to be fixed to the surface (2) and an end portion of first flexible sheet (36) opposite to said fastening portion (35) to which said first half-band (32) is fixed; wherein the second fastening device (50) comprises a second flexible sheet (54) having a fastening portion (55) adapted to be fixed to the surface (2) and an end portion of second flexible sheet (56) opposite to said fastening portion (55) to which said third half-band (52) is fixed.
