Abstract (en)

[origin: WO2017079771A1] Drive device (1) for a movable furniture part (2), in particular a door or a flap, with a support (3), with an ejection device (4) which is movable relative to the support (3) and intended for ejecting the movable furniture part (2) from a closed position (SS) in the opening direction (OR), wherein the ejection device (4) has an ejection element (5), which is movably mounted on the support (3), and an ejection force accumulator (6) which acts on the ejection element (5) during the ejection process, wherein the ejection force accumulator (6) has a first force accumulator base (K1) and a second force accumulator base (K2), and with a tensioning device (7) for tensioning the ejection force accumulator (6), wherein the entire ejection force accumulator (6) is movable together with the ejection device (4) relative to the support (3), wherein both force accumulator bases (K1, K2) are movable relative to the support (3) during the tensioning process, wherein both force accumulator bases (K1, K2) are movable relative to the support (3) during the ejection process.
