Abstract (en)  
[origin: WO2018121812A1] Pressure tank for storing high- and low-pressure liquids/gases, in particular LPG or CNG, comprising a hollow body (1) made of a thermoplastic material having at least one opening (11) with a circumferential contact surface (111), a respective connection piece (2) per opening (11), which has at least one respective through-opening (21) to the interior (13) of the hollow body (1) and which is joined face to face with a complementary section (26) by the contact surface (111), wherein the through-opening (21) has a diffuser (22) at a lower end, which closes the through-opening (21) in the axial direction and has openings (221) only pointing substantially in the radial direction, and an anti-static wall (27) is provided surrounding the diffuser (22) inside the hollow body (1), wherein the anti-static wall (27) is part of the connection piece (2) or the collar ring (23) or is secured to the coupling part (3) as a separate part.
