Abstract (en)
[origin: EP3375654A1] A marker (15, 16) display device for an electromechanical device including at least two scales (11, 12) on which a plurality of markers (15, 16) are distributed, respectively linked to the values of physical magnitudes corresponding to at least a first and second physical magnitude linked to each other and relative to the operation of an electromechanical device; a first and a second indicator (13, 14) are adapted to indicate a value associated with the first and second physical magnitude, respectively, both indicators being aligned on aligned markers (15, 16), belonging to a first and a second graduated scale (11, 12) during the normal operation of the elements of the device assembly.
