Abstract (en)

[origin: WO2017084945A1] The invention relates to a cleaning piston (1) for a mixing head (15) of a reaction molding machine, comprising a main part (3), which has a cylindrical casing region (2), and a clearing part (4), the material and geometry of which are designed to remove residual material adhering to a channel (5) of the mixing head. The clearing part at least partly consists of a non-polar material. The invention additionally relates to a mixing head for a reaction molding machine, said mixing head comprising such a cleaning piston, to a reaction molding machine comprising such a mixing head, and to a discharge pipe (21) for such a mixing head.
