Abstract (en)

[origin: WO2017086895A1] The present invention relates to an absorption assembly (1), which is provided between the coatings (K) mounted on the in-vehicle sheet metal (S) and the vehicle sheet metal (S) and which prevents noise and vibration, comprising at least one coating contact extension (2) which extends from the coating (K) in the vehicle towards the body sheet metal (S), at least one protrusion (21) which extends from the coating contact extension (2) towards the sheet metal (S) in an angular way, at least one wedge (3) which forms a barrier between the coating contact extension (2) and the in-vehicle body sheet metal (S), and which comprises at least one recess (31) having a structure in which the protrusion (21) provided on the coating contact extension (2) can engage, and which absorbs the vibration occurring on the coating (K).
