Abstract (en)

[origin: WO2017084932A1] The invention relates to a structure (200) for a land vehicle for public passenger transport, particularly a bus-type vehicle, characterised in that it comprises at least two rigid rings (2021-2029) which encircle said structure (200) in the direction of the width thereof, around an interior defined by said structure (200). The invention also relates to a public transport vehicle, particularly a road vehicle, and particularly an electric vehicle, comprising such a structure.
