Abstract (en)  
[origin: WO2017085203A1] The invention relates to a conveying system (1) for conveying items (2.1, 2.2) to be conveyed. The conveying system (1) comprises a conveying path (30) and at least one first conveying means (6) that can move along the conveying path (30) and is designed to convey a first item (2.1) to be conveyed. The conveying system (1) also comprises at least one second conveying means (7) which can move along the conveying path (30) along with the first conveying means (6) and which is designed to convey a second item (2.2) to be conveyed that is of a different type than the first item (2.1).
