Abstract (en)  
[origin: WO2017085091A1] The invention relates to a spool (1) for winding a fibrous web (2), the lateral surface of which is formed by a coated spool core (3). The aim of the invention is to improve the winding quality by the fact that the outer lateral surface is formed by a plurality of separate coatings (4, 5) which are arranged axially next to one another, of which at least two adjacent coatings (4, 5) are made of different materials.
