Abstract (en)

[origin: WO2017084901A1] The present invention relates to a fuel injector (10) having at least one spray pipe (22), in order to be used for providing spraying of fuel into the combustion chamber (32) in a controlled manner in internal combustion engines. As an improvement, the subject matter fuel injector (10) comprises at least one induction coil (70) connected to said spray pipe (22) in order to increase the temperature in the vicinity of the spray pipe (22).
