Abstract (en)

[origin: WO2017085281A1] The invention relates to a method for operating a computer system (10), to a computer program (20) with an implementation of the method, and to a computer system (10) designed to carry out the method. At least one software application (20) which functions as a host application (20) and at least one software application (14-18) which functions as a guest application (14-18) are run on the computer system (10), wherein the guest application (14-18) or each guest application offers at least one addressable software function (24-28). The host application (20) uses at least one addressable software function (24-28) of the at least one guest application (14-18) on the basis of a configuration (22), and a position of the use of the at least one software function (24-28) is specified on a display unit (30) as part of the configuration (22).
