Abstract (en)

[origin: WO2017121569A1] In a winding arrangement with a foot for stationary potting in order to provide a winding arrangement (1) having a number of winding sections (2a, 2b, 2n) which are arranged one on top of the other in the vertical direction, which are arranged at a distance from one another and which are electrically connected to one another so as to form a series circuit, wherein each winding section (2a, 2b, 2n) has winding layers (3) which are wound one on top of the other, the winding layers (3) are insulated from one another and have an electrical conductor, in which winding arrangement slipping of the winding sections is avoided, it is proposed that the winding layers (3) are fixedly connected to one another by means of a layer connecting means (5).
