Abstract (en)  
[origin: WO2017084954A1] The invention relates to a holding frame (1) for holding plug connector modules (2), in particular for installation in plug connector housings or for screwing onto wall surfaces. According to the invention, in order to permit an improved manipulation and a secure mounting and assembly of the holding frame (1) comprising holding frame halves (4, 5), the holding frame (1) has a stop (A1, A2) in a plugged-in state for stopping the plug connector module (2) during insertion into the holding frame (1), wherein the stop (A1, A2) is designed in such a way that when a plug connector module (2) is stopped in the plugged-in state, holding frame holding means (11) and plug module holding means (9) engage in one another in the holding state.
