Abstract (en)
[origin: WO2017084654A1] The invention relates to a plug connector which has a base body and a slide element (1), wherein the base body has a plug side and a connection side, wherein the plug connector forms a plug axis (A) which extends from the plug side to the connection side through plug the connector, wherein the slide element (1) surrounds the base body and is arranged on the same to be movable along the plug axis (A). The connector additionally has a securing element (2), wherein the securing element (2) is arranged between the slide element (1) and the connection side of the plug connector, and wherein the securing element (2) is arranged on the base body to be movable between an open position and a locked position.
