Abstract (en)  
[origin: WO2017089868A1] A collapsible bed base includes a plurality of elongate frame members (10) and a plurality of frame supporting members (12) each comprising a foot portion (16) for resting on a floor and at least two openings (18) sized to receive an end of one of the elongate members (10) therein. The frame supporting members (12) together hold frame members (10) parallel to the floor to thereby form an assembled frame for the bed base. A plurality of mattress supporting members (14) each have a flat upper surface (20) for receiving a mattress thereon. A plurality of frame engaging formations (22) enable the mattress supporting members (14) to be held securely in a horizontal position by the assembled frame thereby to receive a mattress on top of the mattress supporting members (14).
