Abstract (en)

[origin: WO2017091791A1] The present invention provides methods, compositions, and kits for the treatment and/or diagnosis of psoriasis. The invention includes a method for diagnosing psoriasis, comprising measuring a level or combination of levels of one or more of: IL-5, IL-6, IL-7, IL-10, IL-13, IL-33, FGF-B, GMCSF, VEGF, IL-33, MCP-1, or IP-10, or combinations thereof, in a sample from a patient; comparing said measured level or combination of levels; and correlating said level or combination of levels with a manifestation of psoriasis within said patient. A medicinal composition comprising an herbal combination of Da Huang, Sheng Di Huang, and Jin Yin Hua for the treatment of psoriasis in a patient. A kit for diagnosing and/or prognosing psoriasis in a patient.
