Abstract (en)
[origin: WO2017089559A1] A pack (10) for consumer goods comprises an outer shell (12) and an inner box (14). The outer shell comprises a front wall (18), a rear wall (28) shorter than the front wall, a top wall (24), a bottom wall (26) connecting the front wall to the rear wall and side walls (20, 22) connecting a portion of the front wall to the rear wall. The inner box is for containing consumer goods (38), and comprises a front wall (30), a rear wall, side walls (32) connecting the front wall to the rear wall, a top wall (34) and a bottom wall. The front and top walls of the inner box have an opening (36). A hinge (16) connects the inner box to the outer shell. The hinge is flexibly connected to the rear wall of the inner box and flexibly connected to the upper edge of the rear wall of the outer shell so that the inner box can move between a closed position in which the inner box is nested in the outer shell and the bottom end portion of the inner box is overlain by the front, rear, side top and bottom walls of the outer shell, through an intermediate position in which the top wall of the inner box is visible immediately over the outer shell top wall, to an open position in which the upper end of the inner box is clear of the outer shell. A blank (60) for the pack is also provided.
