Abstract (en)
[origin: WO2017089244A1] Described is a scour protection device (1) comprising a collecting structure (10), at least one protective structure (20) on the collecting structure, and at least one fastening element (30) on the collecting structure, the fastening element being designed to be fastened to a supporting unit (60, 70). The invention is characterized in that the collecting structure has at least one hole (11, 12, 13, 14, 15) and the protective structure has at least one hole (21, 22, 23, 24, 25) that at least partially overlaps with the hole in the collecting structure.
