Abstract (en)

[origin: WO2017088956A1] Disclosed is a multifunctional valve for a gas vessel, comprising a fill stop valve, an outlet valve and a fill level indicator, the fill stop valve and the fill level indicator each being provided with a float. The disclosed multifunctional valve is characterized in that the fill stop valve, the outlet valve and the fill level indicator are fixedly mounted on a common flange and form a multifunctional element that is fastened to the gas vessel.
