Abstract (en)
[origin: WO2017089925A1] The present invention relates to a hood for household environments (1) comprising a containment frame (2), a forced suction unit (5) comprising a suction section (5b) and an outlet (5d), a first opening (3) in said containment frame (2) placed in fluid communication with the outlet (5d) of said forced suction unit (5) and said outlet (5d), being arranged to be engaged by a fume discharge conduit (14), a second opening (4) in said containment frame (2) placed in fluid communication with the outlet (5d) of said forced suction unit (5) and with the environment external to the containment frame (2), at least one filter (6a, 6b) operatively placed in fluid communication with the suction section (5b) of said forced suction unit (5) and with the environment external to said containment frame (2). The feature of the hood is to comprise a first filter holder compartment (8a) designed to contain said at least one filter (6a, 6b) arranged between said outlet (5d) of said forced suction unit (5) and said fume discharge conduit (14), said first filter holder compartment (8a) comprising a closure (9) movable between a first position, in which said at least one filter (6a, 6b) is accessible to allow the removal of the at least one filter (6a, 6b) from the filter holder compartment (8a) and a second position in which said closure (9) provides a tight seal of said first filter holder compartment (8a) between said outlet (5d) of said forced suction unit (5) and said fume discharge conduit (14).
