Abstract (en)

[origin: WO2017089522A1] The invention relates to a method for issuing products from a vending machine system comprising at least one vending machine, at least one ticket apparatus, and at least one cloud server, wherein the at least one ticket apparatus comprises at least one apparatus selected from a group comprising a ticket dispenser, a ticket storage unit, a ticket selection device, and/or a ticket acquisition device, wherein the at least one cloud server comprises at least one software selected from a group comprising an online sales platform, a ticket database, at least one virtual vending machine and/or advertising software, wherein at least one ticket is generated by means of the at least one cloud server and the ticket is acquired via the at least one cloud server, wherein the ticket is dispensed via the ticket apparatus and the vending machine is prompted to issue a product by means of the ticket. The invention also relates to a vending machine system.
