Abstract (en)

[origin: EP3381330A1] The invention relates to a self-adjustable backrest device formed from a movable plate that pivots with respect to a horizontal shaft (3), the plate and shaft being connected together by means of a first set of hubs. The shaft is also connected to a second set of hubs that are in turn associated with a supporting member that can be either the backrest of an existing chair or a backrest that forms part of the device.
