Abstract (en)

[origin: EP3381819A2] A machine for producing packages of containers, in particular containers of pourable food, comprises: - a first feeding device (4) for feeding a plurality of containers (100), - a second feeding device (8) for feeding a succession of empty inner boxes (200), - a filling station (6) having a manipulator (7) configured to pick up at least one group of containers (100) fed by the first feeding device (4) and to release the at least one group of containers (100) in at least one respective inner box (200) fed by the second feeding device (8), - a packing station (9) where each inner box (200) filled with the containers (100) is enclosed into a respective outer box (300) having an open lid, and - a closing station (400) located downstream of the packing station (9) for closing the lid of each outer box (300) to obtain a closed package.
