Abstract (en)
[origin: EP3382071A1] A frame structure for a comber includes right and left frames (25, 24). A plurality of rails (26) are coupled to the right and the left frames (25, 24). The frame structure is dividable into right and left frame units (U2, U1) including the right and the left frames (25, 24), respectively. The right frame unit (U2) includes a plurality of rail members (28) forming parts of the respective rails (26) and each coupled to the right frame (25) at one end thereof. The left frame unit (U1) includes a plurality of rail members (27) forming parts of the respective rails (26) and each coupled to the left frame (24) at one end thereof. One of the frame units (U2, U1) includes a middle frame (39) to which the other ends of the rail members (28, 27) of the frame units (U2, U1) are coupled, and the other of the frame units (U2, U1) includes a rail supporting frame (F) that supports the rail members (28, 27) of the other.
